

Current CSS Volunteer Needs

Resource Development Committee Roles & Responsibilities

The Resource Development Committee (RDC) is a group of dynamic volunteers who support the Fundraising and Marketing operations of CSS. As members, we ask that you introduce your friends, family members, neighbors, work colleagues, etc. to the varied programs and works of Community Support Services. Through volunteer activities, fundraising events and networking opportunities, the RDC assists in cultivating the next generation of leaders committed to CSS and serving those in need in our community. The RDC meets monthly from August through May. One of the main activities is fundraising efforts surrounding CSS' spring fundraising event, *Beat the Odds*.

Program Committee Roles & Responsibilities

The Program Committee works to strengthen the activities and programs of CSS by advising, planning, coordinating, problem solving, monitoring and evaluating Community Support Services' programs. The committee then makes recommendations to the Board of Directors in order to uphold and develop the goals for the agency. Members usually have an interest or background in programs, operations, and/or community life as related to people with I/DD. The committee has identified five principles that guide their decision making process: quality and effectiveness, equal participation, collaboration, advocacy, and education.

Administrative Assistance with Filing

Whether you have just an hour or two to devote, an entire week, or would prefer ongoing volunteer work, we can keep any idle hands busy in our finance department. We have a continual need for filing of invoices which will keep our organization running smoothly.
